INNOVATION

n.slaughtered animals and GWP per animal, DK 2021

GWP impacts, dairy & suckler slaughtered cattle, DK 2021

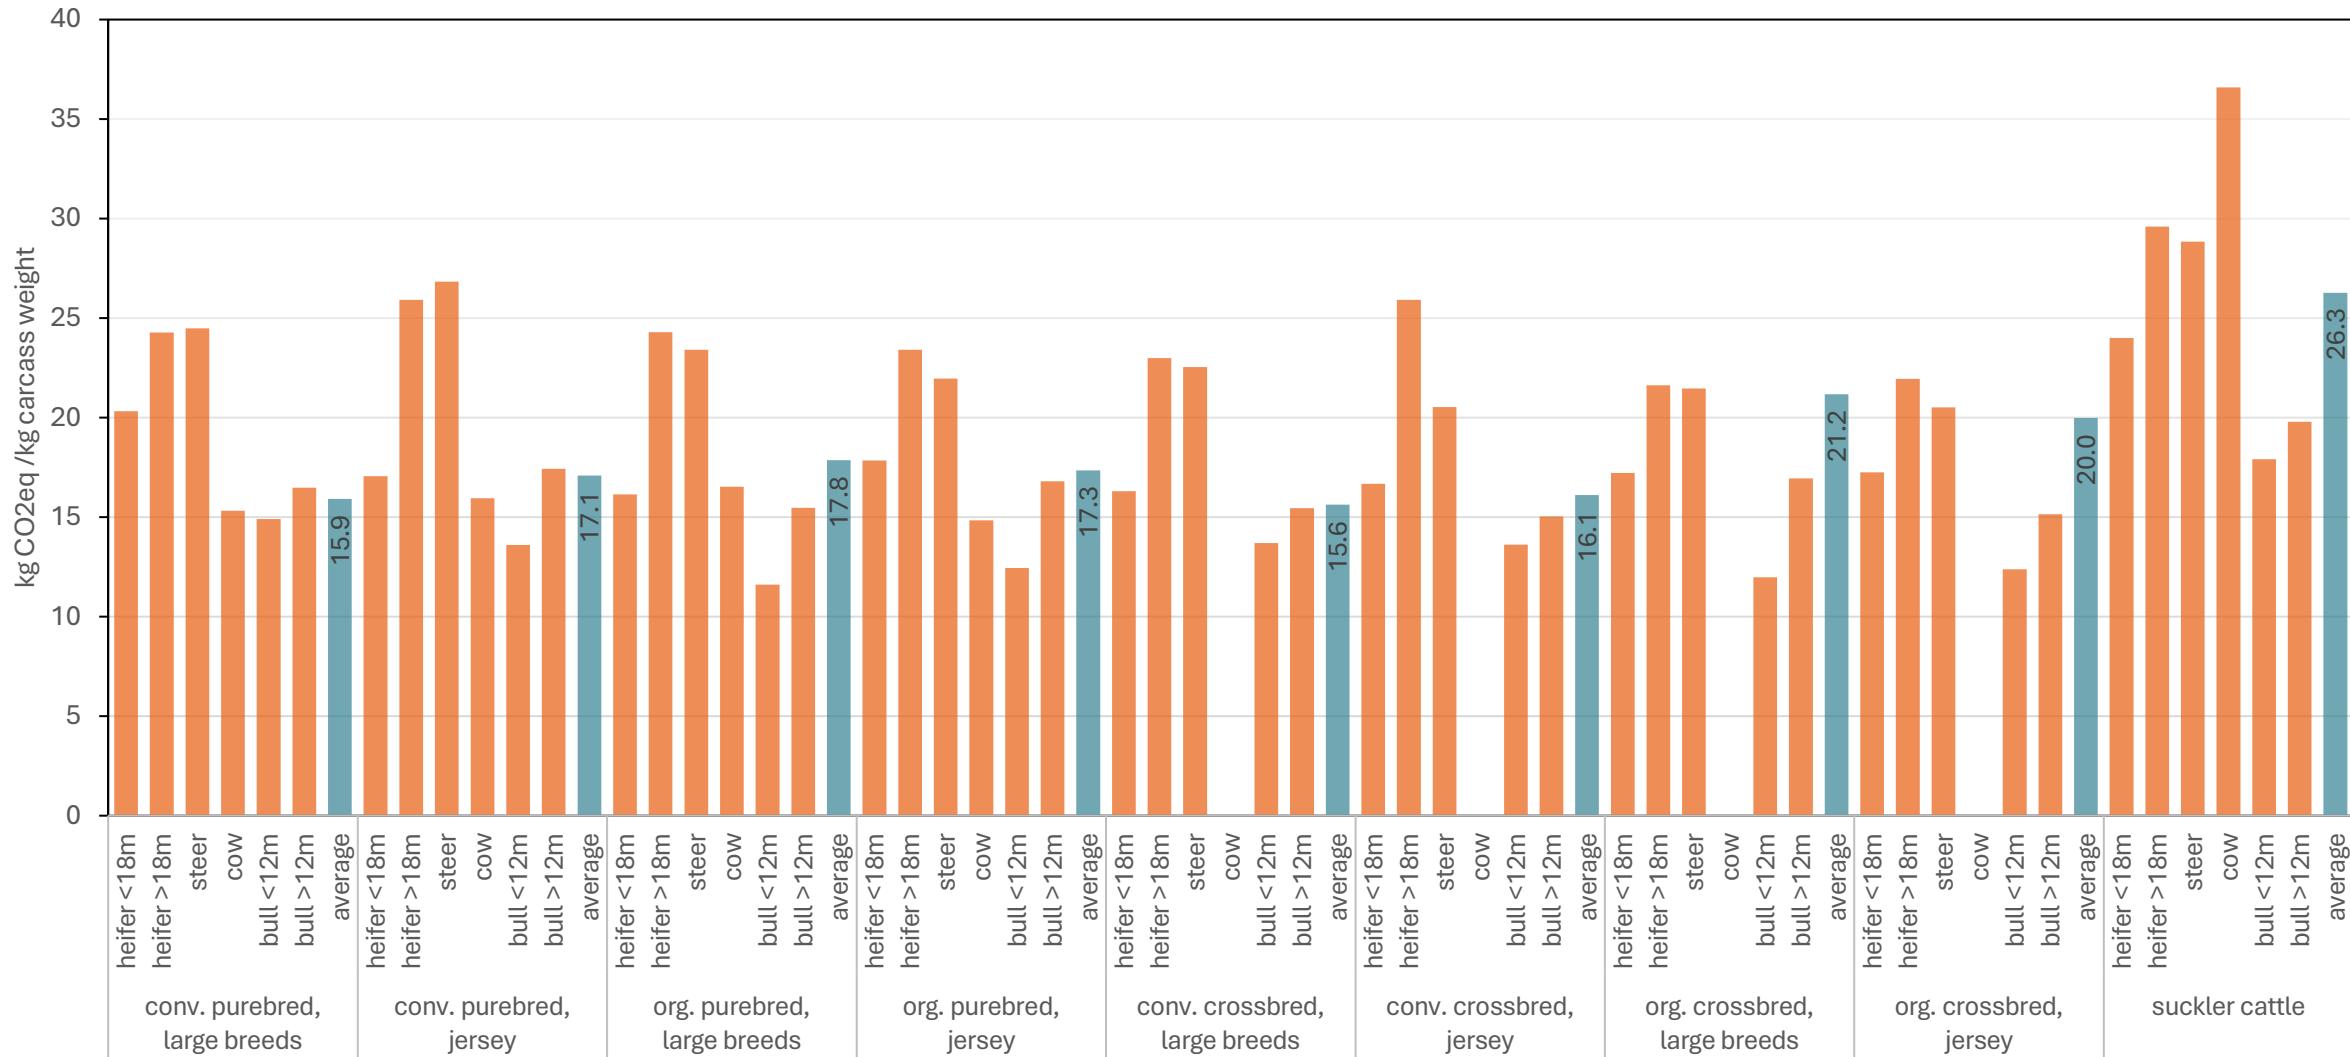

Cow

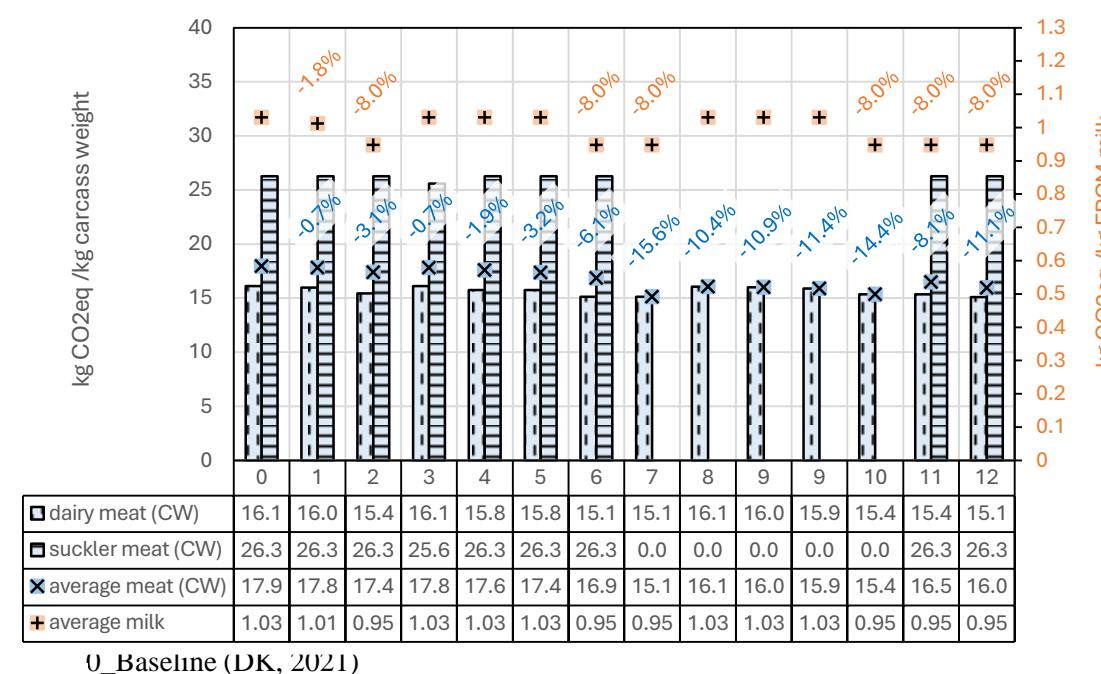

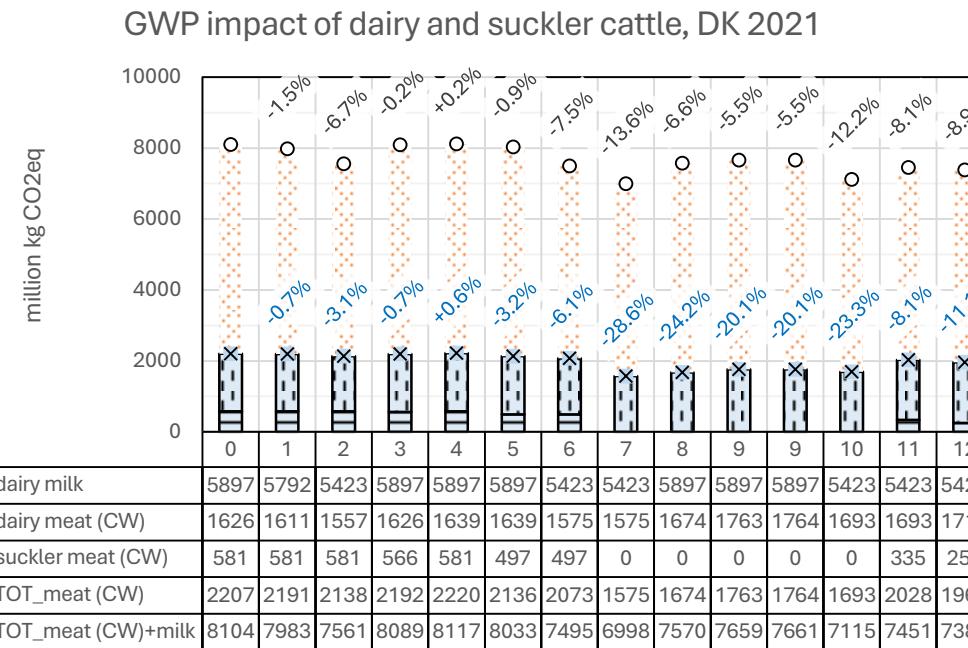

Biophysical allocation, IDF 2022

	Calves %	Milk %
conv. purebred, large breeds	25	(100-25) x 88
conv. purebred, jersey	30	(100-30) x 92
org. purebred, large breeds	26	(100-26) x 88
org. purebred, jersey	38	(100-38) x 92

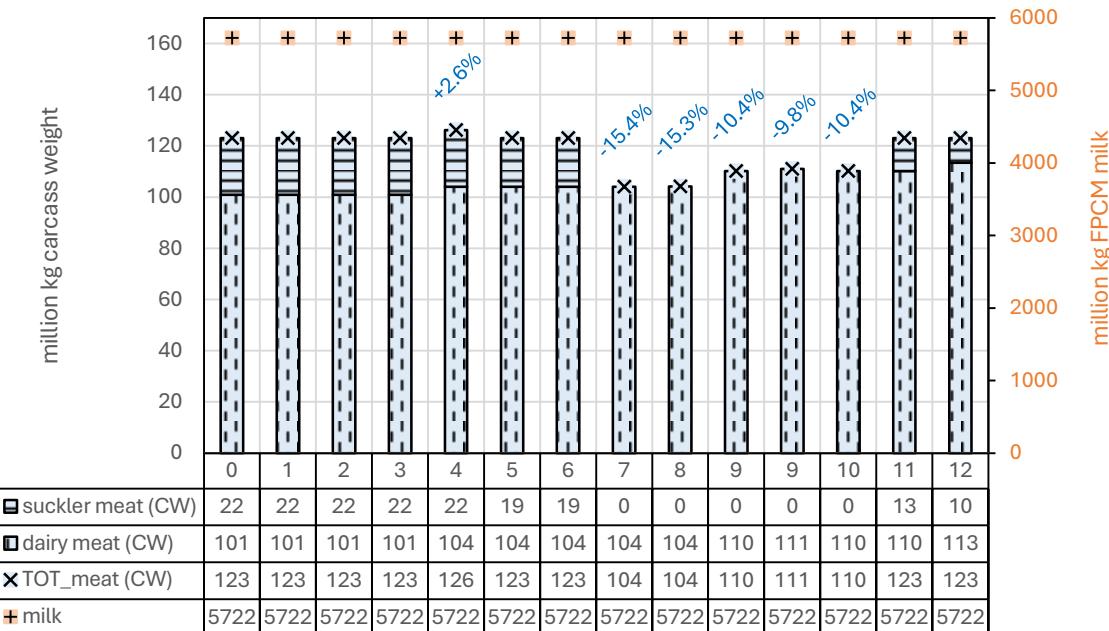

GWP impacts, carcass weight, DK 2021

GWP impact of meat (CW) and milk, DK 2021

Carcass weights & Milk amounts, DK 2021

- 0_Baseline (DK, 2021)
- 1_Bovaer on conv. dairy cows and heifers after 18months (80 days)
- 2_Bovaer on conv. dairy cows and heifers after 18months (all year, except grazing time)
- 3_Bovaer on suckler cows and heifers after 18months (1/4 of the year)
- 4_Crossbreeds (90% pure-race bulls & steers replaced by cross-breed), with surplus of meat
- 5_Crossbreeds (90% of pure-race bulls & steers replaced by cross-breed) + reduction of 14 % in suckler population (same TOT meat production as in baseline)
- 6_<5+2>
- 7_<6> + no suckler cattle
- 8_Reduction in export of calves: 35% is raised in DK as bulls <12 months (the rest is exported) + no suckler cattle
- 9a_Stop export calves, calves grown in DK up to slaughtered bulls <12months + no suckler cattle
- 9b_Stop export calves, calves grown in DK as cross-breeds up to slaughtered bulls <12months + no suckler cattle
- 10_<9a+2>
- 11_<10> + restoring 59% of suckler population (same TOT meat production as in baseline)
- 12_90% purebred bulls raised as crossbred bulls + <10> + restoring 45% of suckler population (same TOT meat production as in baseline)
