

Explanation of input parameters for economic values for YSS in NBDI

Phenotypic levels

Parameters that are based the same data set from Sweden:

- Percentage of bull and heifer calves slaughtered before they are one year old
- Average age at slaughter in days
- Average daily net gain in kg per day
- EUROP form score (scale 1-15)
- EUROP fatness (scale 1-15)
- Percentage of stillborn bull and heifer calves, 2nd+ cows
- Calving ease

The other input parameters are based on values delivered by NAV co-workers from the three individual countries.

Prices

Average exchange rate in Copenhagen for December 2021 (Source: Danmarks Nationalbank)

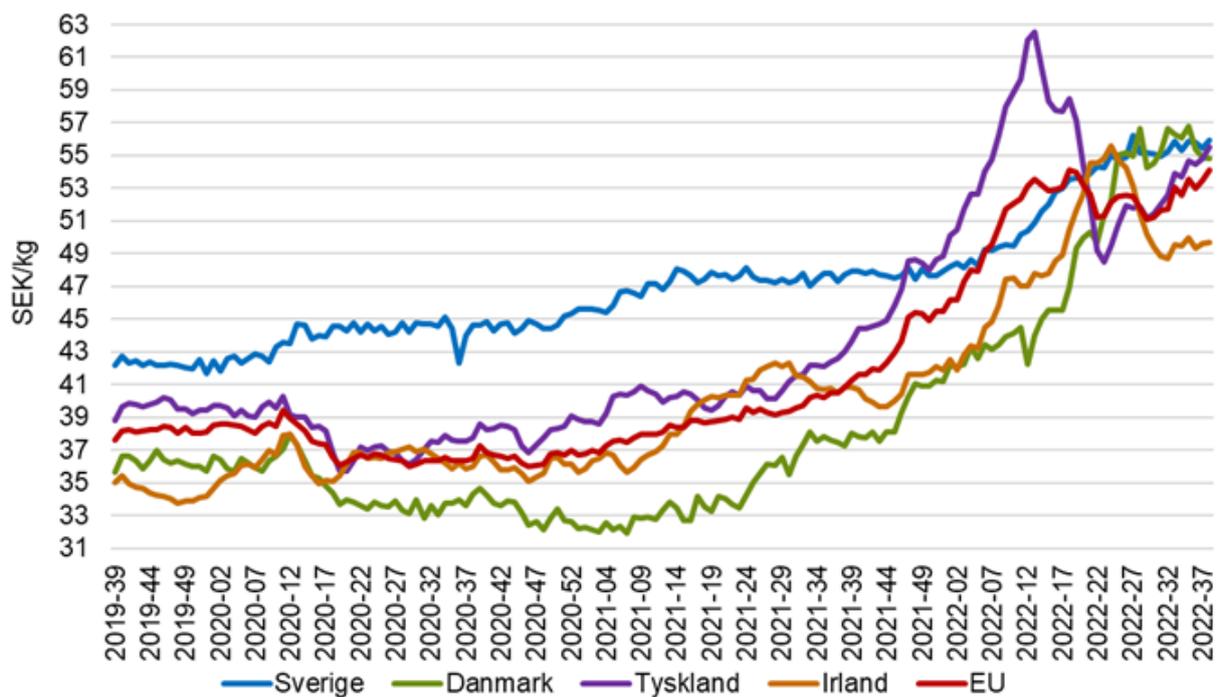

100 EUR = 743.625 DKK

100 SEK = 72.401 DKK

Exchange rate SEK/DKK for december 2021: $100 / 72.401 = 1.3812$ SEK/DKK

Exchange rate EUR/SEK for december 2021: $72.401 / 743.625 = 0.0974$ EUR/SEK

Avräkningspriser ungtjurar R3 3 år bakåt, SEK/kg

We assume a difference of 6.5 SEK/kg between Denmark and Sweden in December 2021.

Danish prices for young bulls and heifers in SEK: $27,85 \text{ DKK/kg} * 1.3812 \text{ SEK/DKK} = 38.47 \text{ SEK/kg}$

Assumed Swedish prices for young bulls and heifers in SEK: $38.47 \text{ SEK/kg} + 6.5 \text{ SEK/kg} = 44.97 \text{ SEK/kg}$

Assumed Swedish prices for young bulls and heifers in EUR: $44.97 \text{ SEK/kg} * 0.0974 \text{ EUR/SEK} = 4.38 \text{ EUR/kg}$

The following input parameters relate to pricing and are stated per country and across breeds. These prices should be representative for the entire country and true for EUROP conformation score 5 (O) and EUROP fat score 3. New version is based on data for week 49 2021 for Denmark, December 2021 for Sweden and week 2 2022 for Finland
