

Møde med Foderteknik vedr. NIR kalibrering for råprotein i majshelsæd

11. September 2024

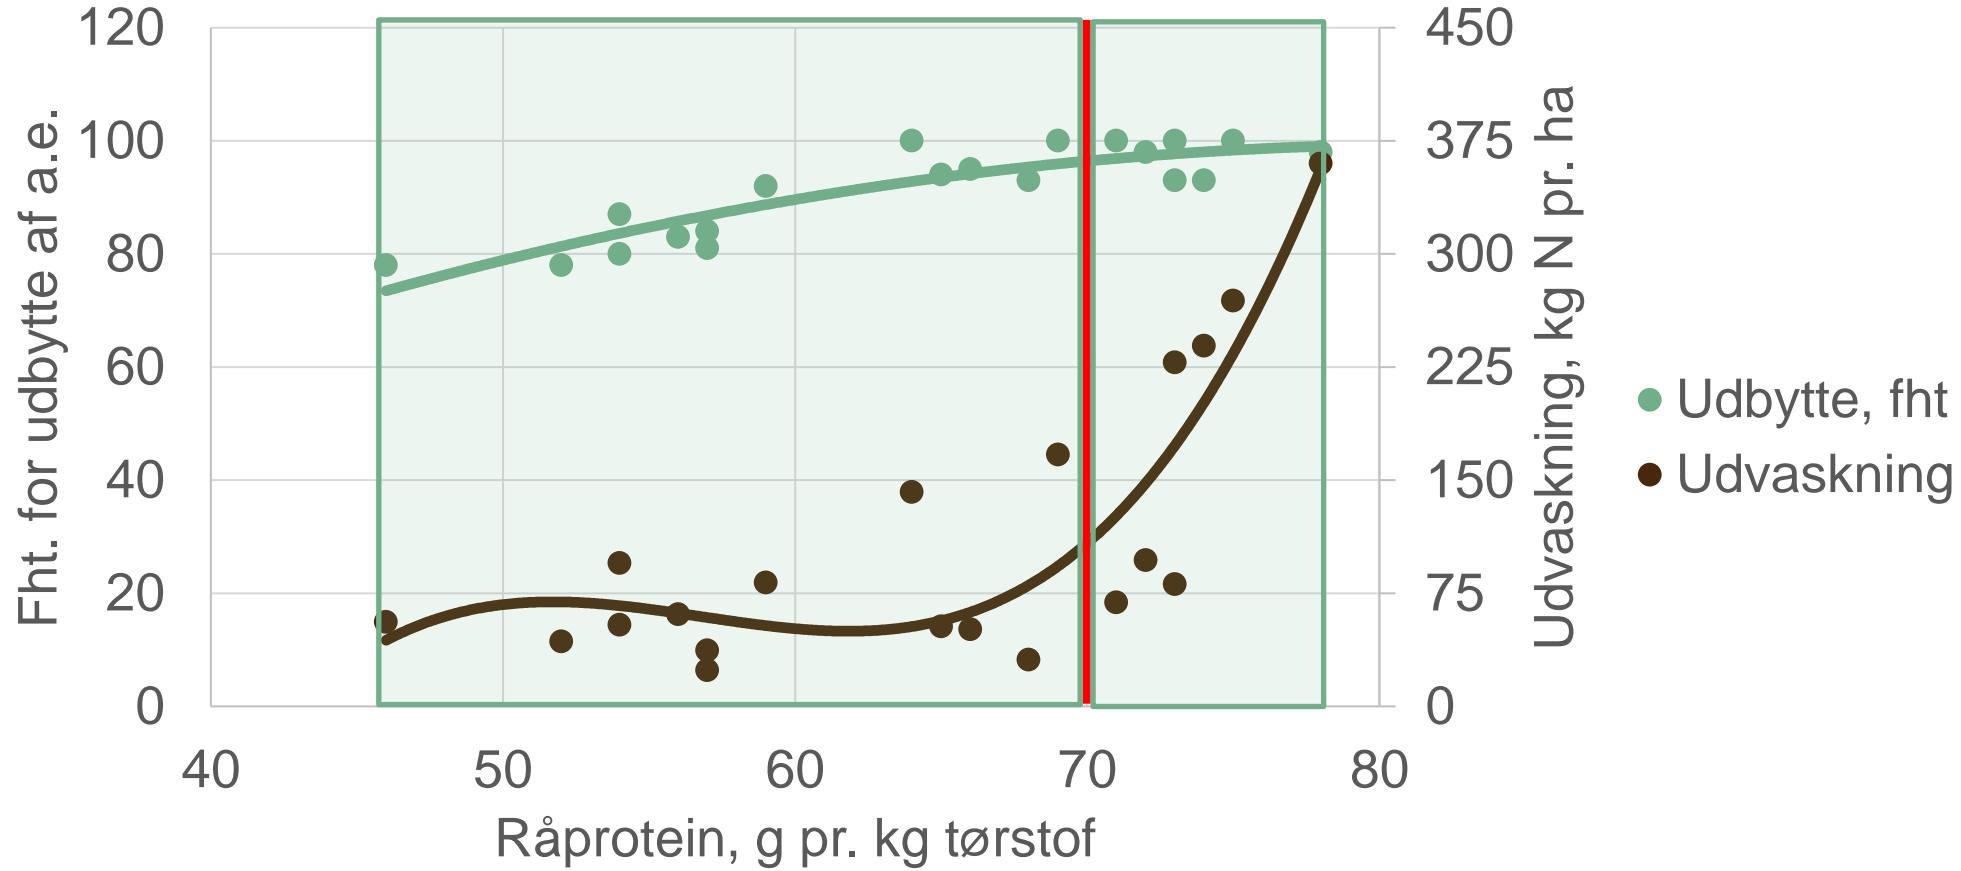

STØTTET AF

Planteafgiftsfonden

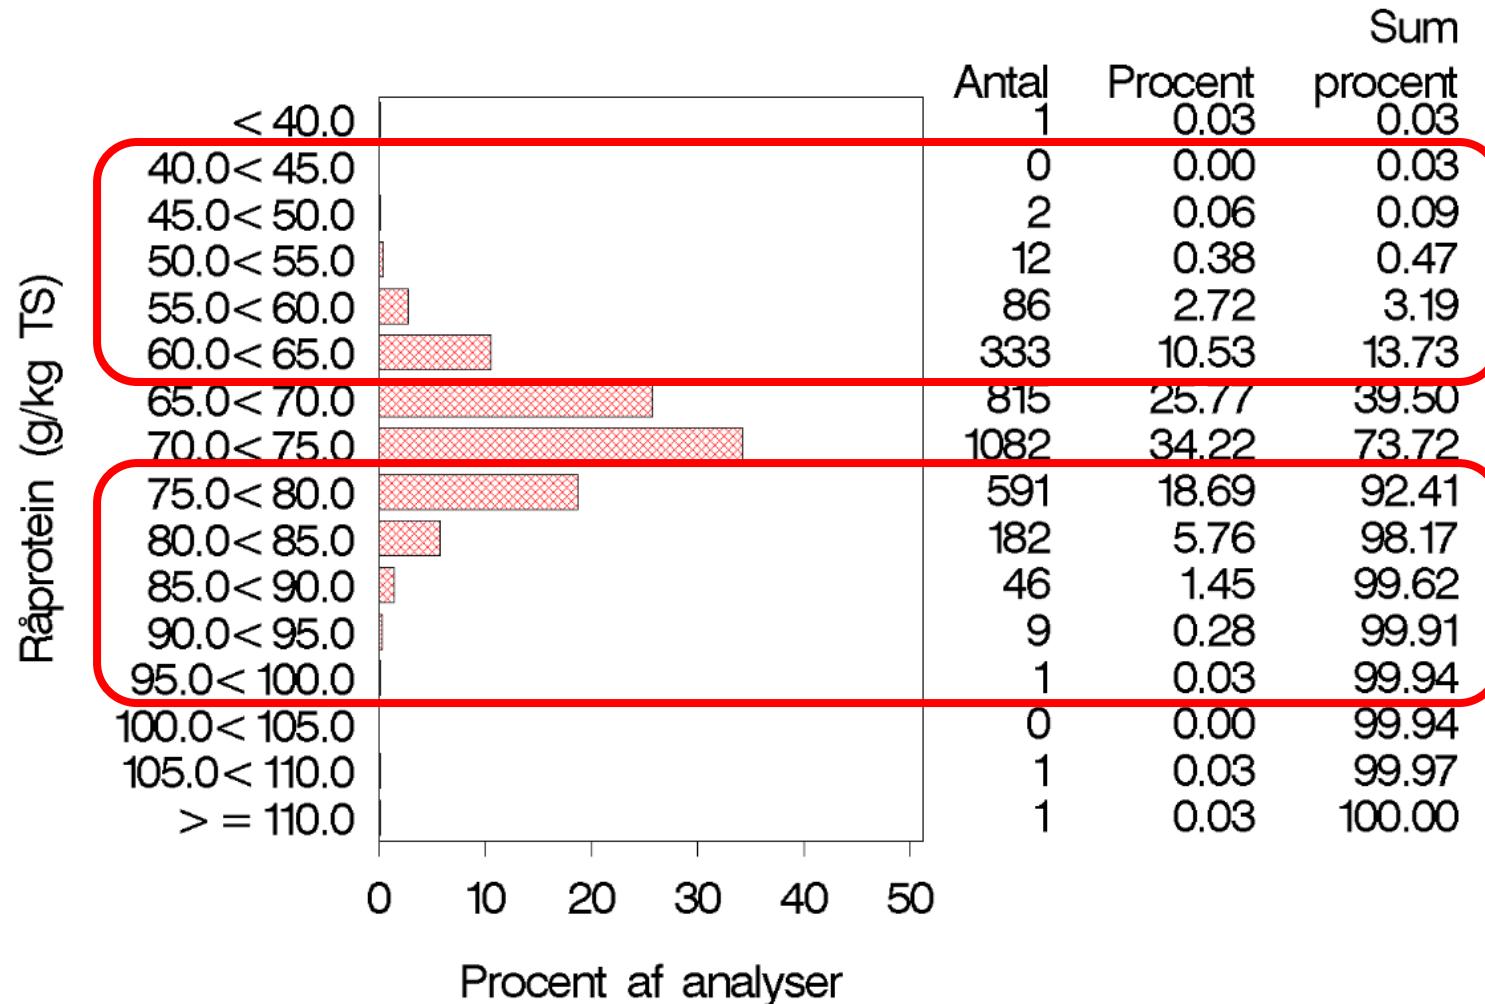

SEGES
INNOVATION

Råprotein, udbytte og kvælstofudvaskning

5 forsøg 2021 og 2022, alm. rajgræs sået i st. 16, forfrugt majs

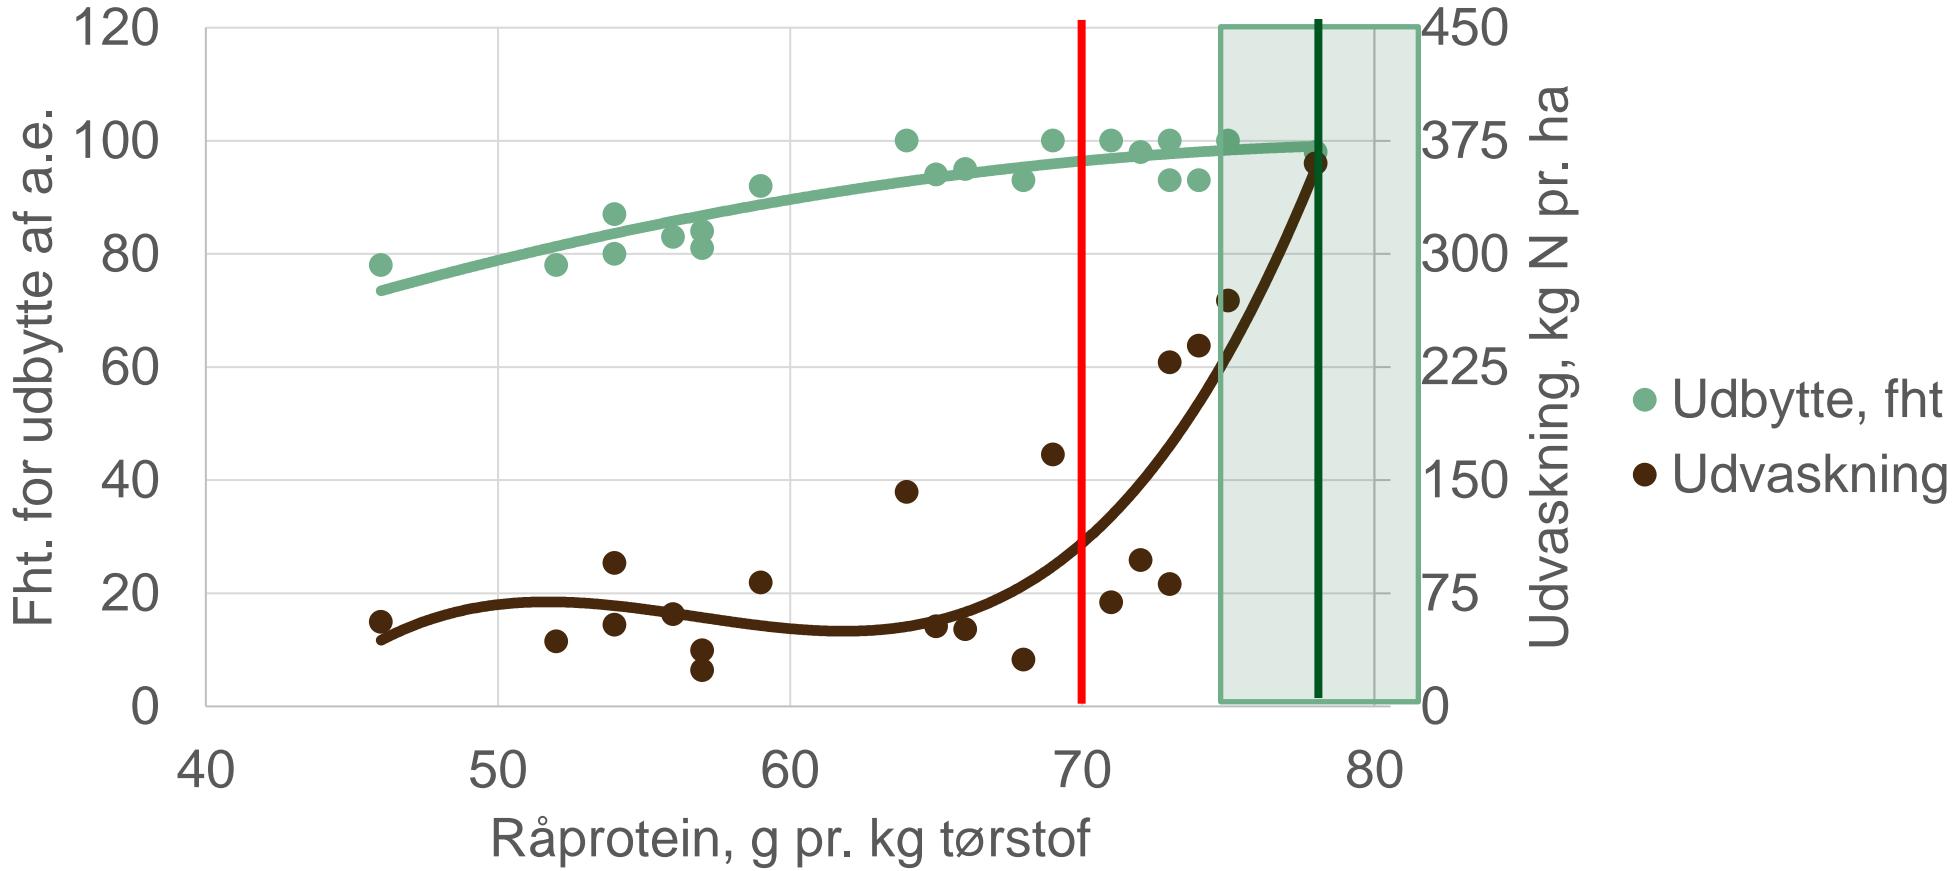

3100 majsanalyser – høst 2022

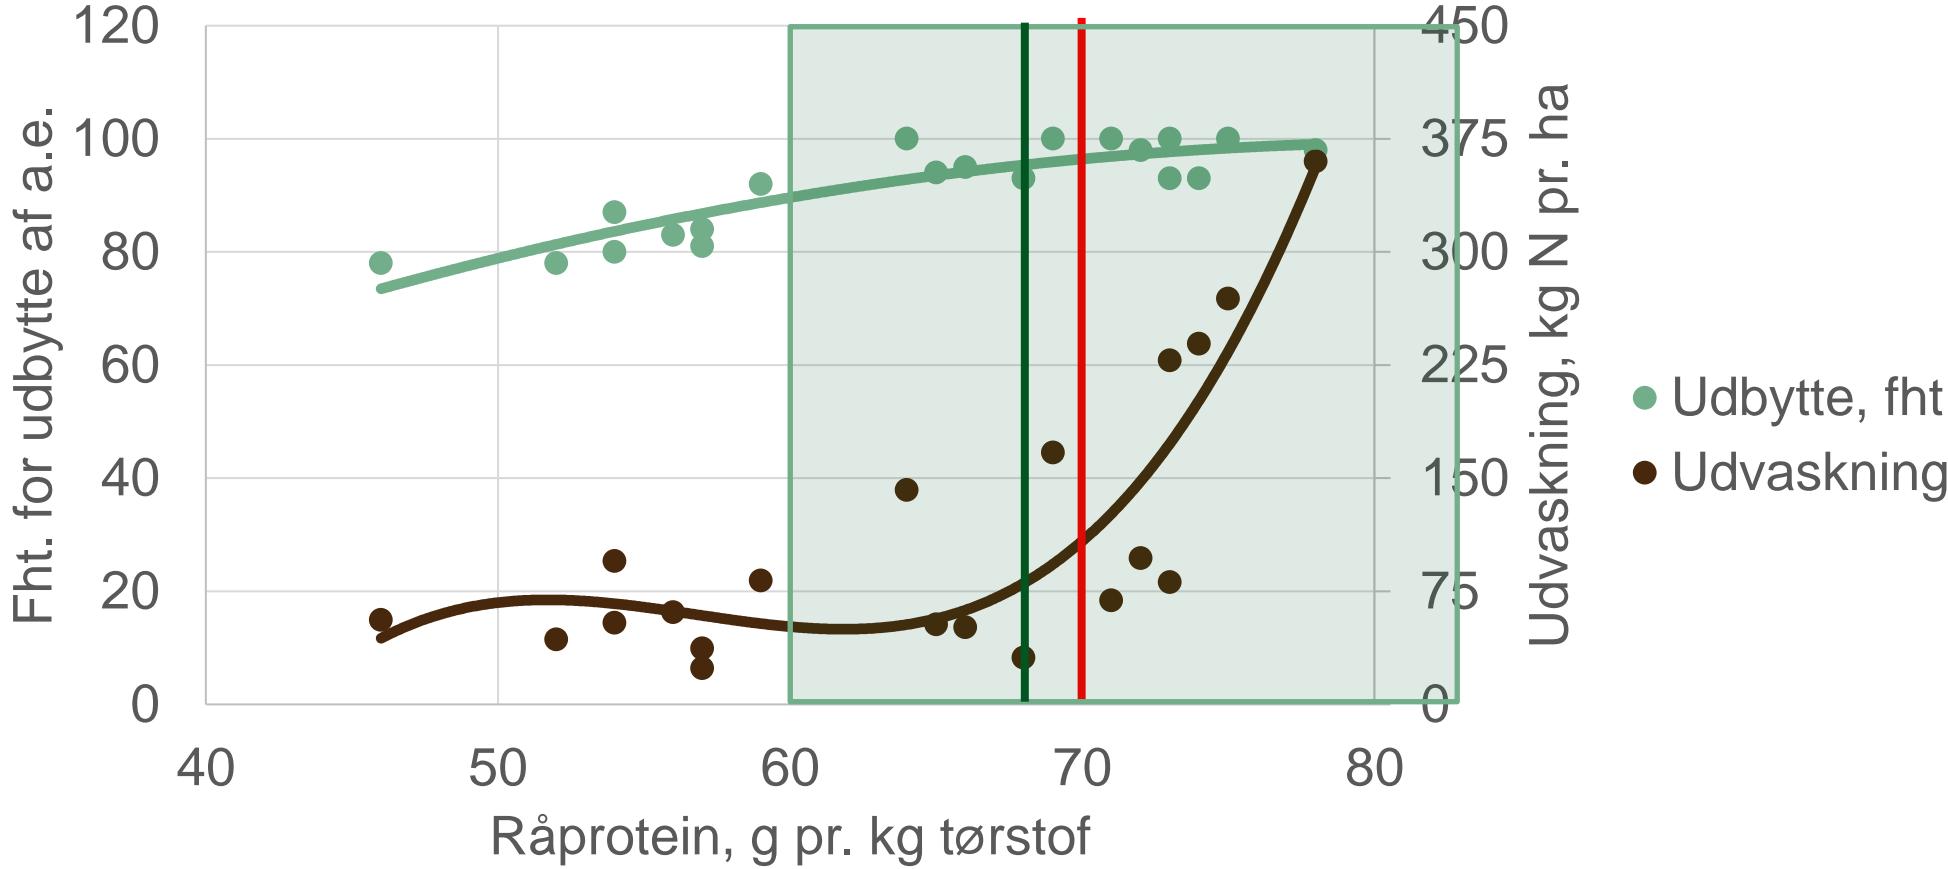

Råprotein i 3 majsmarker på samme bedrift, høst 2023

	Forfrugt	Antal prøver	Gennemsnit	Variationsbredde
			<i>gram råprotein pr. kg tørstof</i>	
Mark 1	kløvergræs	8	78	74-82
Mark 2	3 år med majs	7	68	60-82
Mark 3	Kartofler, majs, byg	8	60	47-68

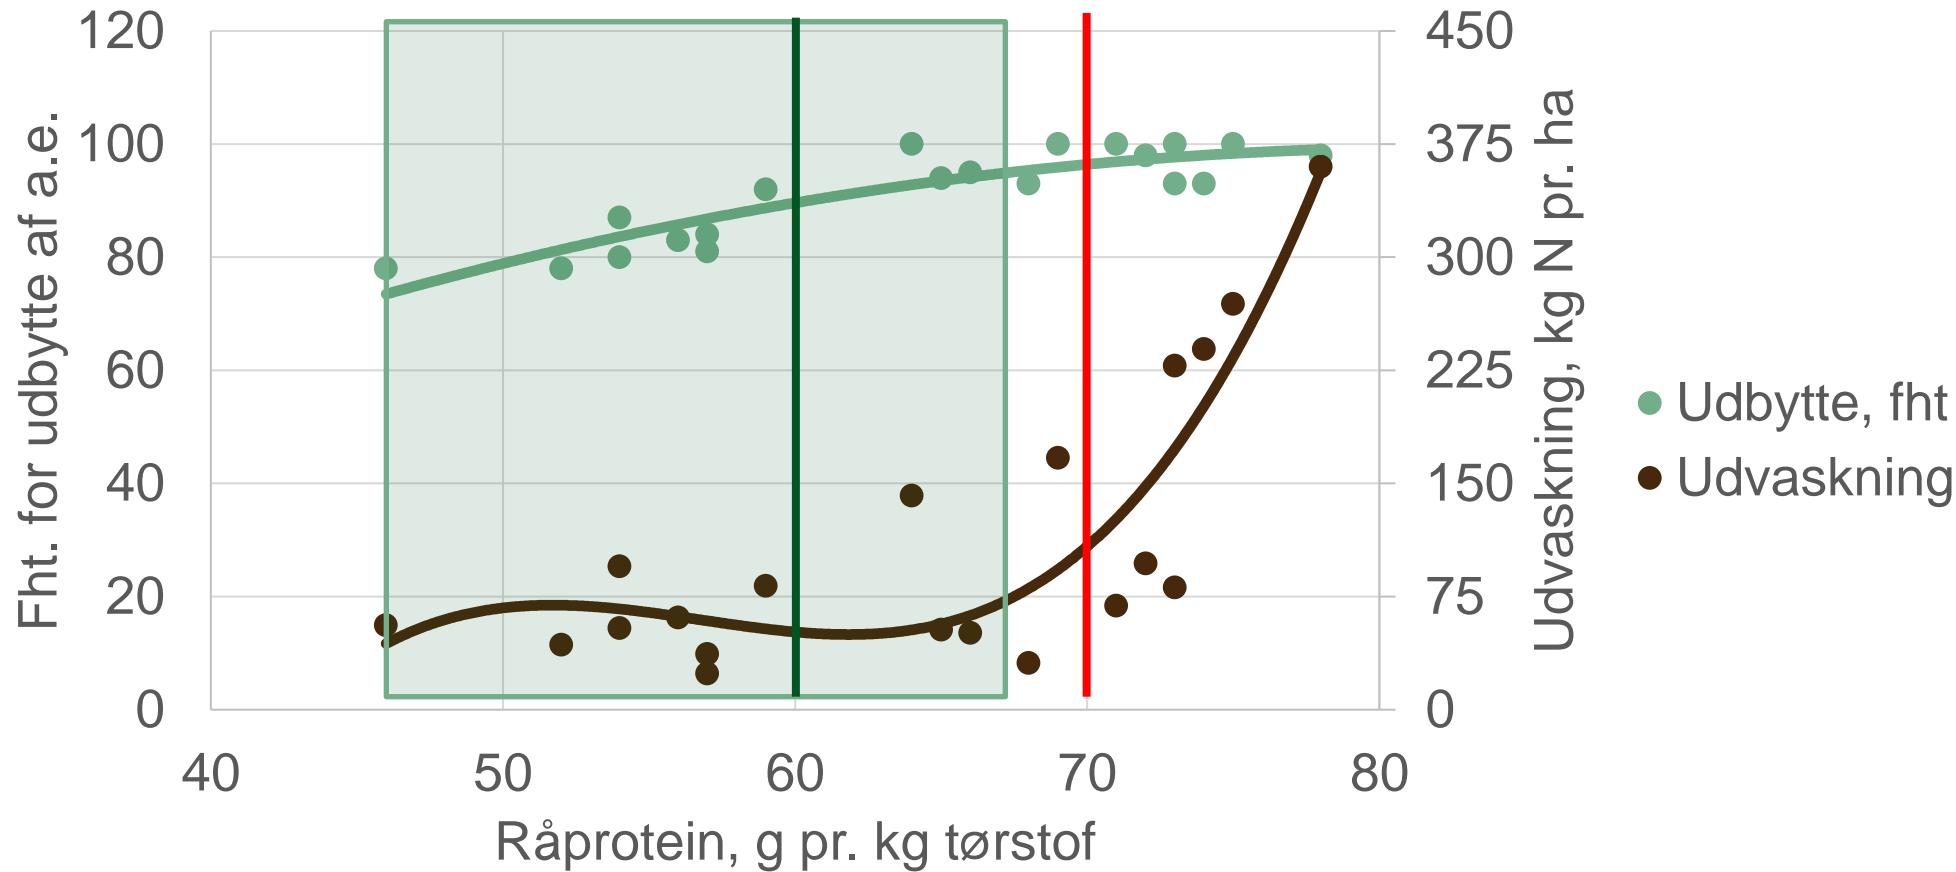

Mark 1 – forfrugt kløvergræs

Mark 2 – forfrugt flere år med majs

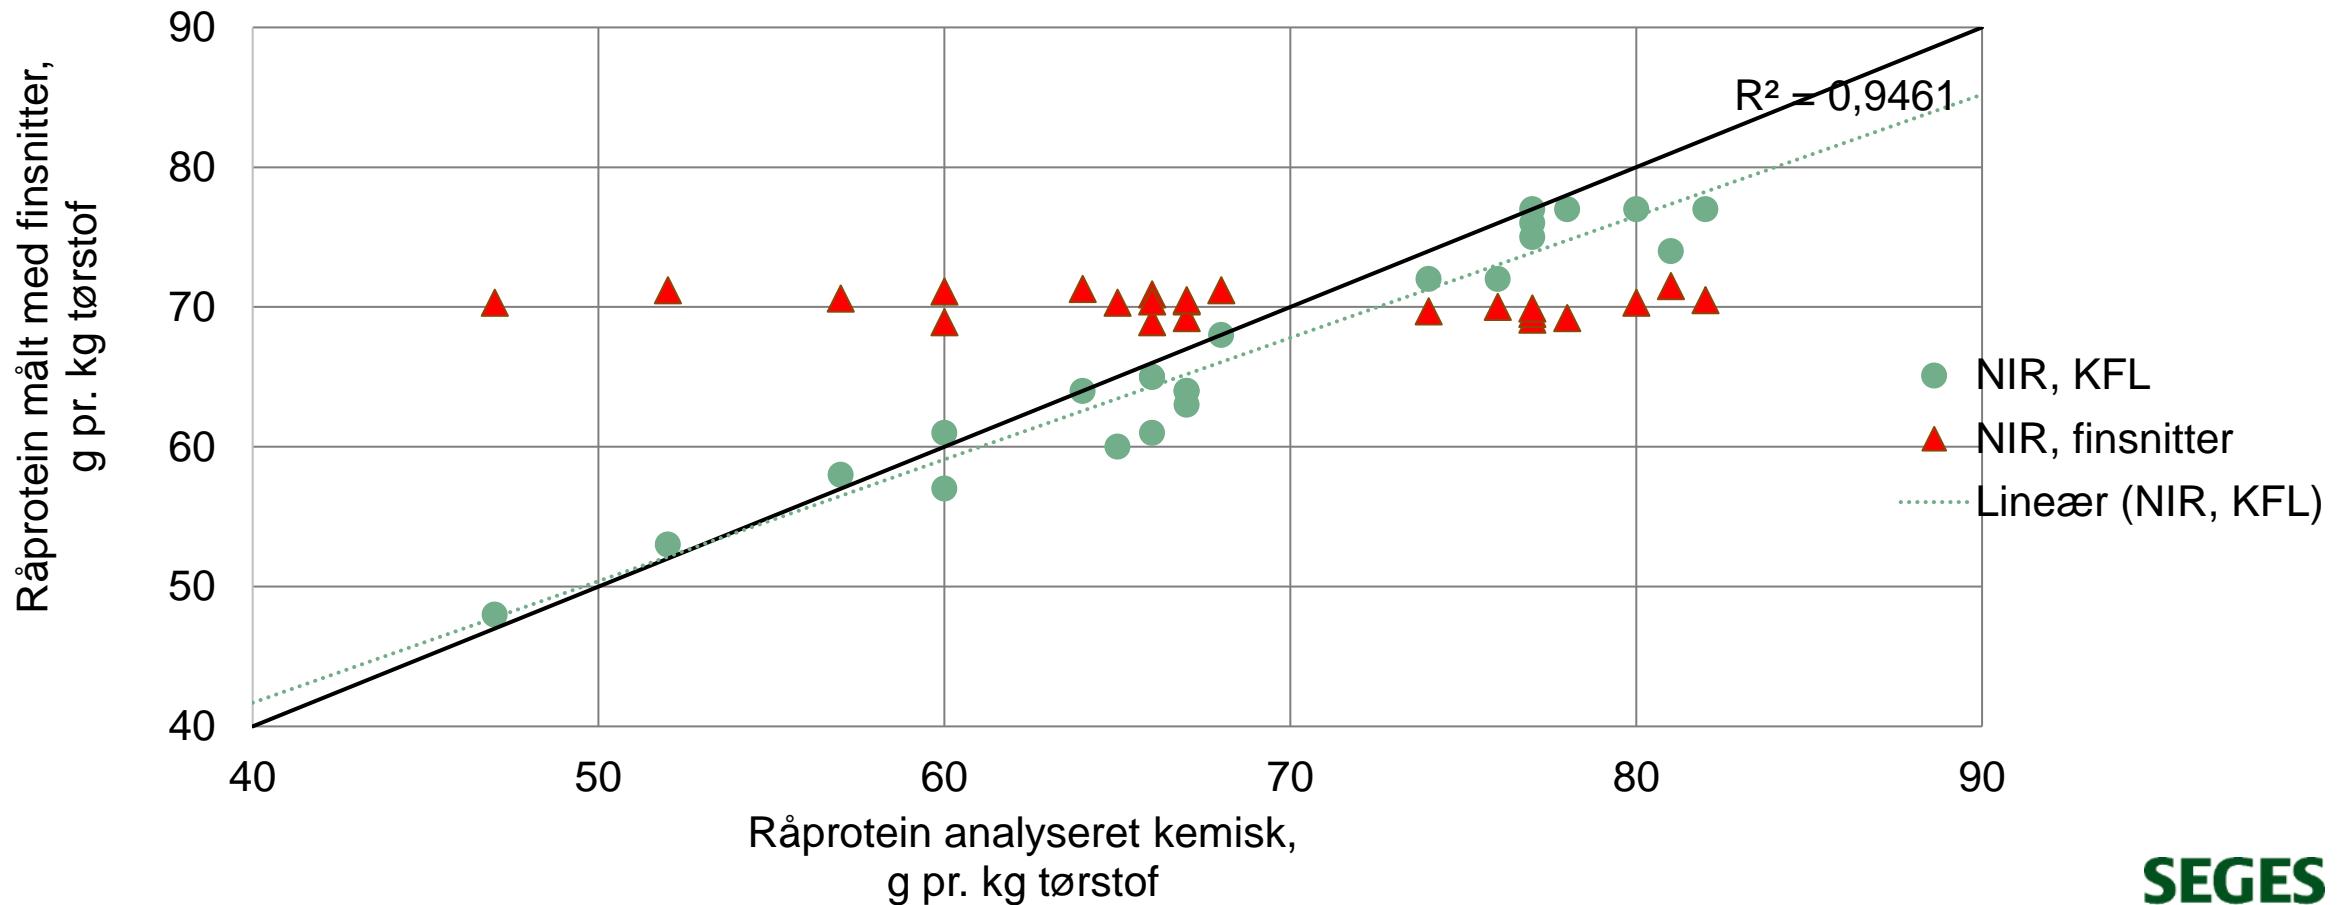

Mark 3 – forfrugt kartofler, majs, korn

Ringe præcision med NIR-sensor på finsnitter

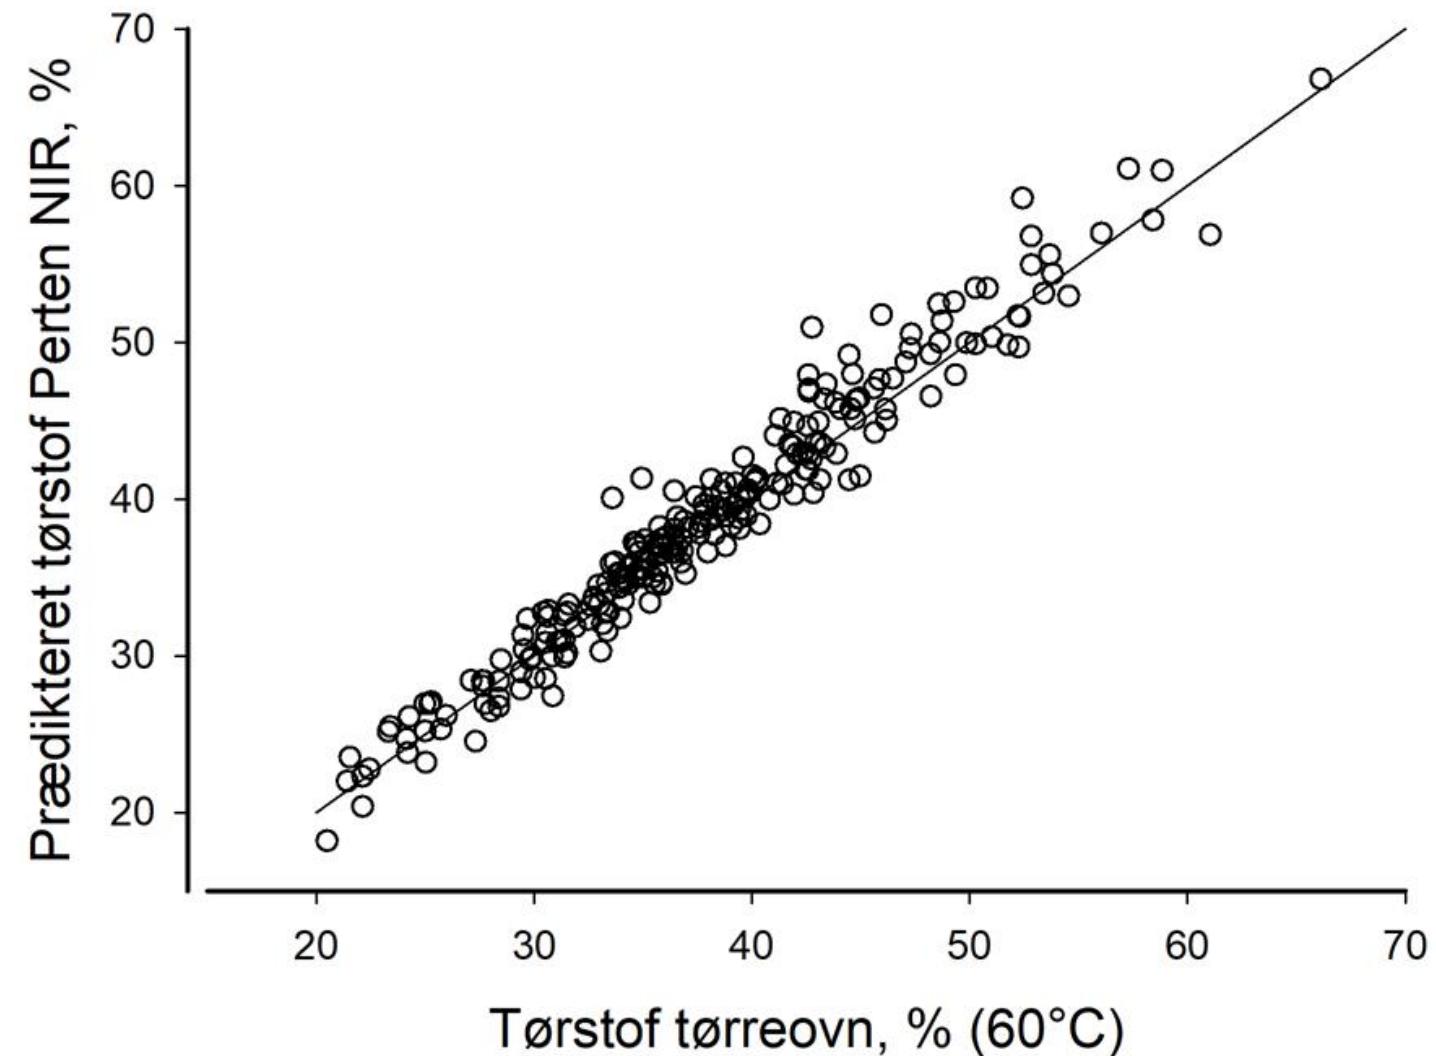

23 prøver i 2023

Råprotein målt kemisk og med NIR på laboratorie og finsnitter

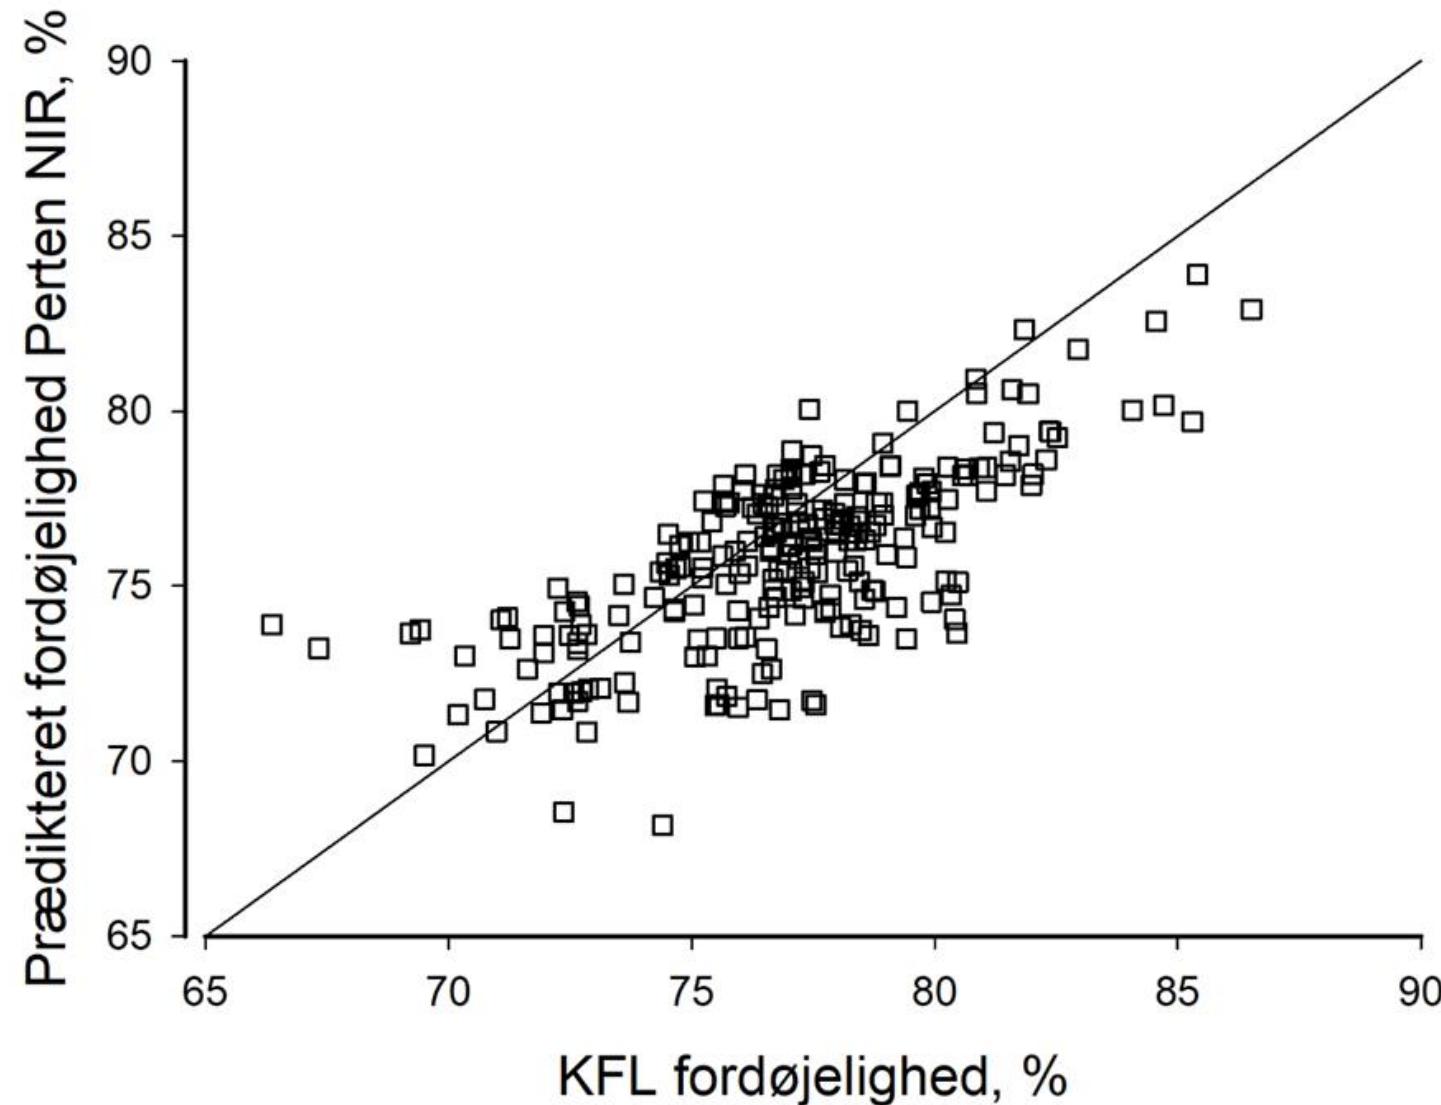

Tørstof #134 (bias = 0,7 %, SEP = 1,8 %, n = 237)

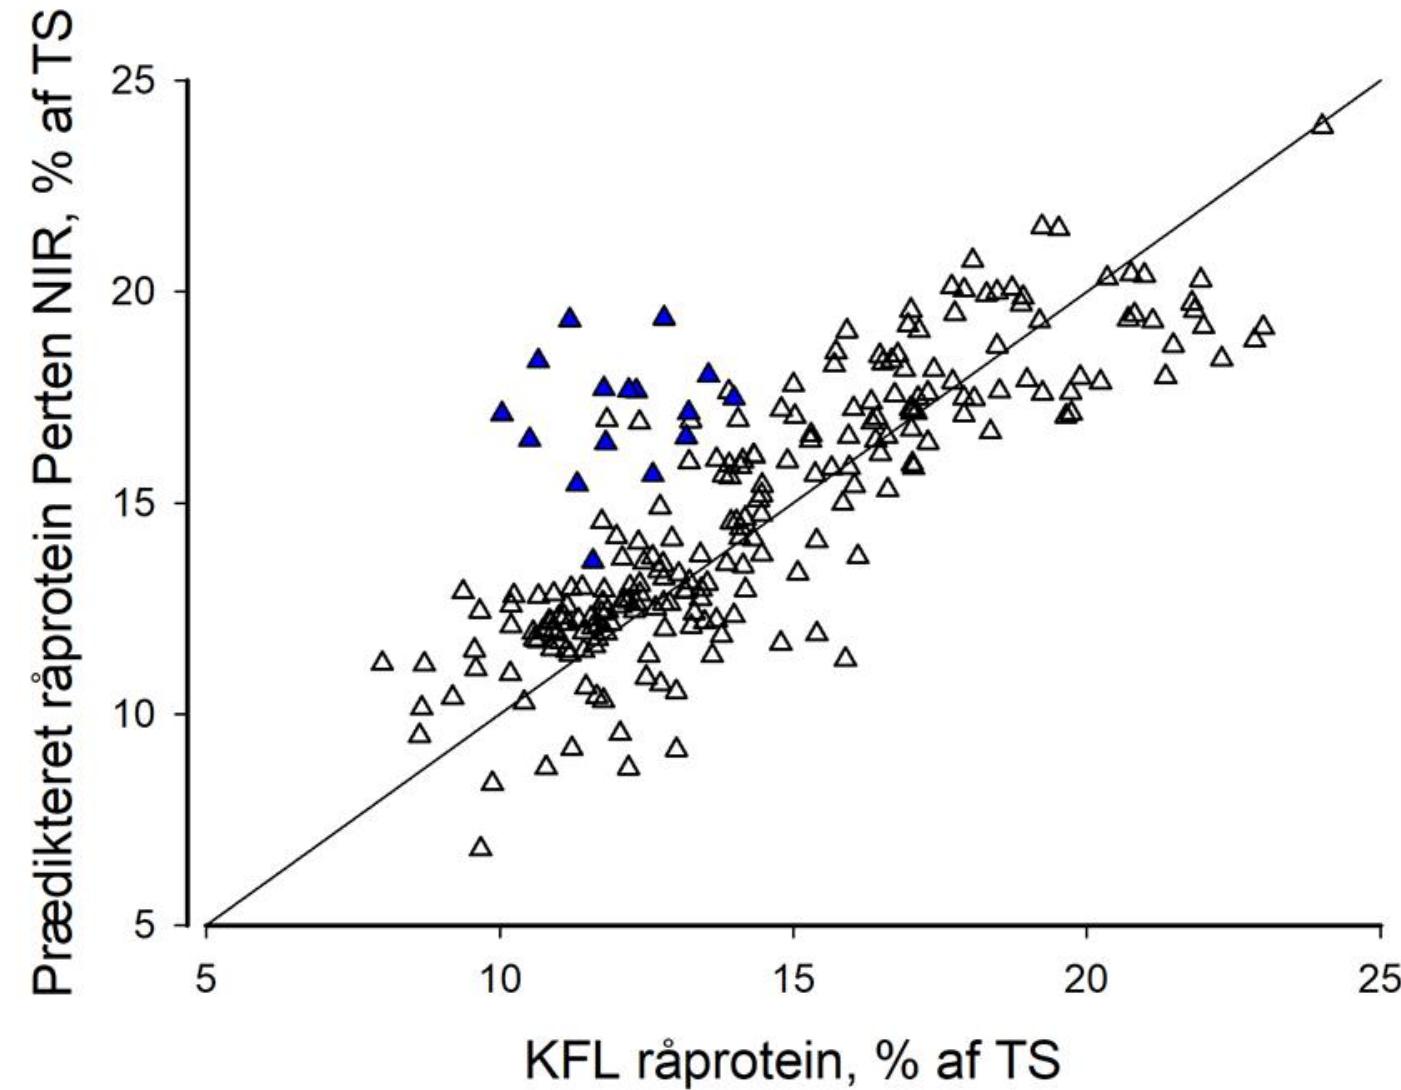

Fordøjelighed #134 (bias = -1,2 %, SEP = 2,1)

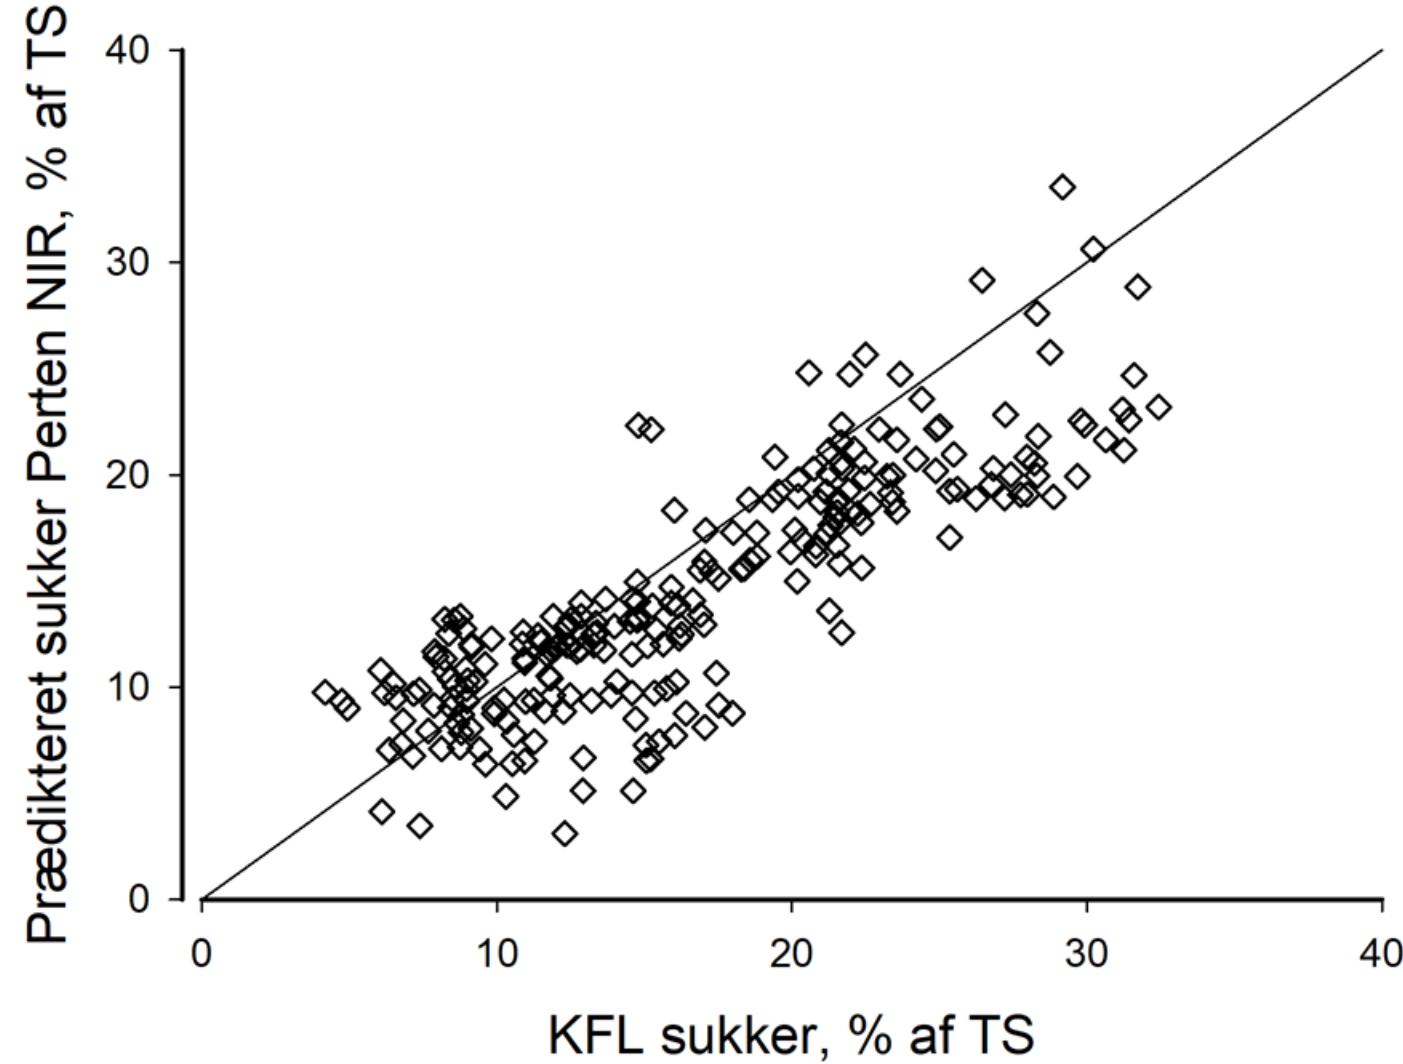

Råprotein #134 (bias = 0,6 %, SEP = 2,1 %)

Sukker #134 (bias = -2,2 %, SEP = 3,7 %)

EVO NIR on forage harvester green maize . accuracy evaluation with LAB

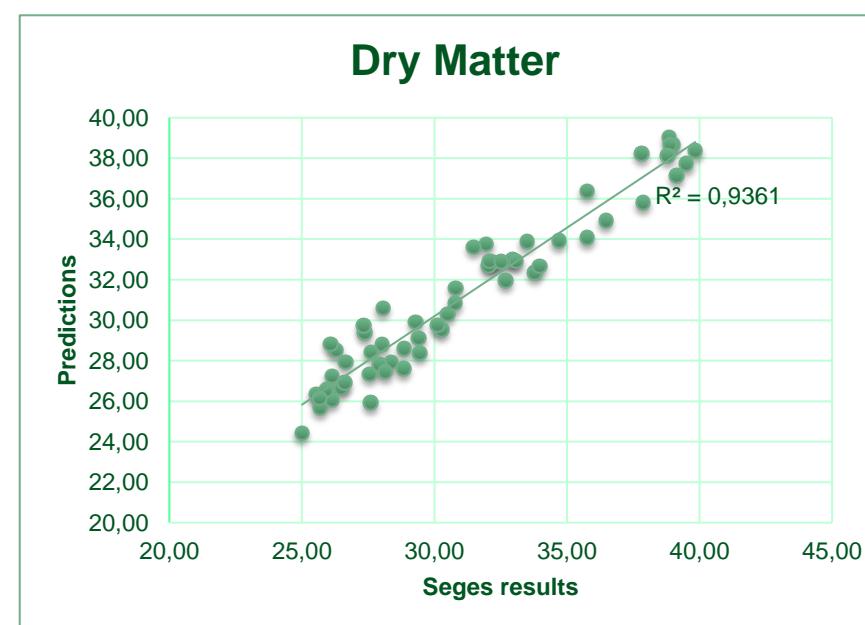

SEGES lab collected 58 green maize samples and sent them in Dinamica Generale together with lab values. We scanned all samples with our EVO NIR master instrument and verified the readings of our calibration

SEGES							
Statistic	C.Protei						
s	DM	Starch	n	NDF	Ash	Sugar	DOM24
Average	31.0	8.3	2.2	11.8	0.9	2.7	78.6
SD	4.5	2.5	0.3	1.4	0.1	0.6	1.2
MIN	25.0	4.0	1.6	9.9	0.7	1.6	76.1
MAX	39.8	13.1	2.9	15.6	1.2	3.7	82.2

MAX	39.0	12.4	2.7	15.2	1.1	3.2	80.8

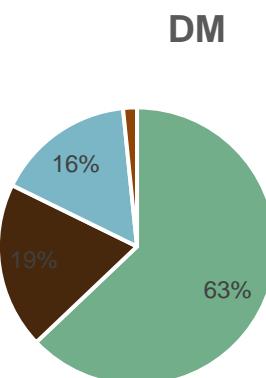

Reported here the variability of nutrients on the 58 samples of green maize.

Green Maize is a crop that typically has a huge variability

Reported here the results of the comparison of SEGES values and readings of EVO NIR with DG calibration.

Starch, C.Protein, NDF, Ash and Sugar are expressed AS IS base.

Considering the huge variability of the nutrients on the batch of 58 samples, EVO NIR is performing very well

CONFIDENTIAL

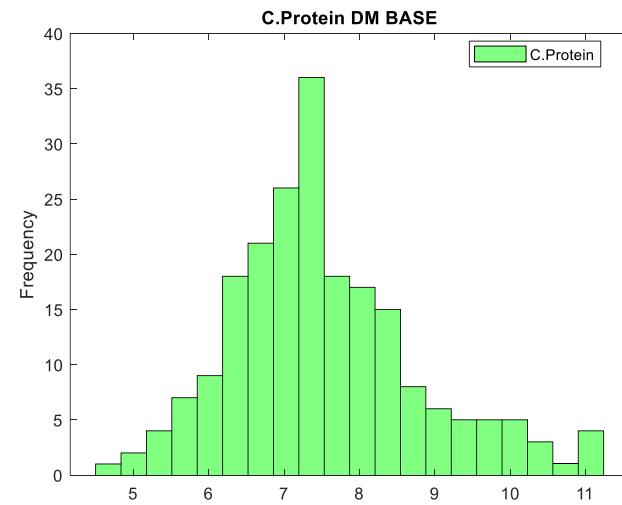

EVO NIR on forage harvester - green maize : Crude Protein Dataset

Our dataset covers following range of values and calibration is developed on AS IS BASE

Dataset	AS IS BASE	DM BASE
Average	2.6	7.5
SD	0.5	1.3
MIN	1.7	4.5
MAX	4.4	11.2

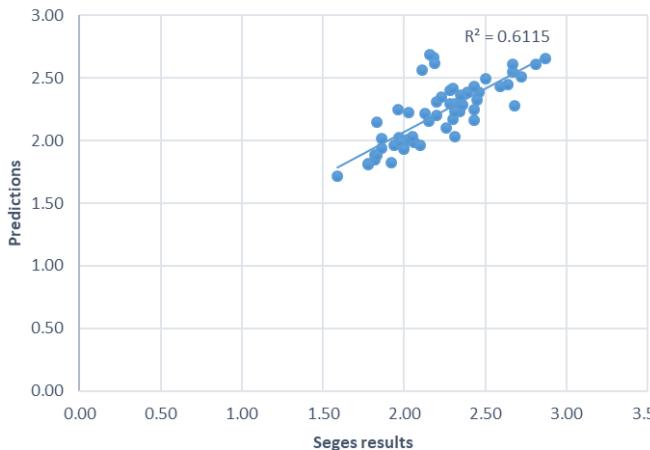

R2 obtained on dataset is 0.72, while expected error is 0.27.

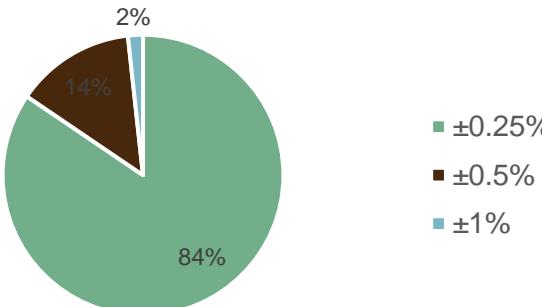

CONFIDENTIAL

EVO-NIR on forage harvester - green maize : Crude Protein Validation

Validation - C.Protein AS IS BASE

C.Protein AS IS BASE

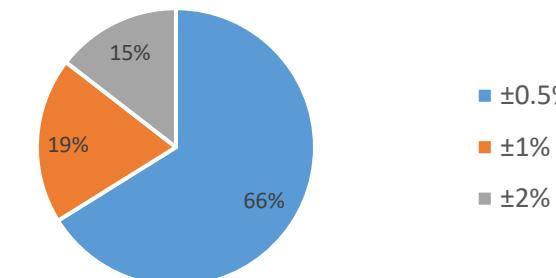

Validation set is composed by 58 samples with following values

Dataset	AS IS BASE	DM BASE
Average	2.2	7.2
SD	0.3	0.8
MIN	1.6	5.5
MAX	2.9	8.8

Comparing predictions DM based with Seges results we see that 66% of the samples have maximum deviation of 0.5%.
