

## Opslag om proteinprognosen på Facebook i gruppen "Præcisionsjordbrug".

Opslag på Facebook i gruppen "Præcisionsjordbrug", hvor vi opfordrer landmænd til at registrere målte proteinprocenter på landmand.dk

Udarbejdet af Mette Kramer Langgaard, specialkonsulent, Planter & Miljø, september, 2022

The screenshot shows a Facebook group interface for "Præcisionsjordbrug". At the top, there are navigation options: "Medlem", "+ Inviter", a search icon, and a menu icon. The group's privacy is set to "Privat" (Private), and it is "Synlig" (Public) to all. A post by Mette Kramer Langgaard, made 7 minutes ago, is the main focus. The post text asks for help in improving a protein prediction model for crops on Fyn, Sjælland, and Lolland-Falster. It mentions that the model is based on a small data set and that users should visit landmand.dk to input their protein percentages. Below the text is a link to "MASKINBLADET.DK" with the title "Seges efterlyser hjælp til at forbedre proteinprognose...". The post has "Synes godt om" (Like) and "Kommenter" (Comment) buttons. To the right of the post, there are sections for "Udvalgte" (Selected) rules, a status "Du er helt ajour" (You are up to date), and a list of recent topics like "#graderettildeling", "#begivenhederoginvitationer", and "#nyviden". At the bottom right, there is a "Seneste medier" (Recent media) section showing a computer monitor displaying a software interface and a yellow combine harvester.
