## Survey amongst Ukrainians in Danish agriculture

---

In cooperation with the Association of Ukrainians in Denmark (AUD) SEGES has conducted a survey amongst Ukrainians who are working or were previously working in Danish agriculture. In the spring of 2022, SEGES has been analysing the survey results.

SEGES' purpose of conducting the survey was 1) to identify areas for improvement in terms of OHS for migrant farm workers; and 2) to identify factors to be aware of and take into consideration when working to improve health and safety for migrant farm workers in Denmark. In such ways, knowledge from the survey aims to support SEGES' work on migrant farm workers' safety in agriculture, and to support the development of safety communication tools for migrant farm workers in Denmark.
