

ELY visit at SEGES Innovation

14th December 2023

Agro Food Park 15, Meeting room 3

Participants

8 participants from ELY-centre, Local Centre for Economic Development, Transport and the Environment

3 participants from the Danish Agricultural Agency

2 participants fra Aarhus University

1 local catchment officer from Djurslands Landboforening

3 participants from SEGES Innovation

Program:

- 9:30-10:00 Introductory presentation of the participants.
Presentation of SEGES, and a roadmap of the different actors in implementing environmental measures.
- 10:00-10:45 ELYs work with regulation and funding schemes.
(SEGES have a strong interest in the following topics, if it is possible for you to present experiences from Finland: What kind of EU-based funding schemes do you have for water and climate, especially if you have schemes for constructed wetland or wetland restoration. What scientific basis on effects is needed for making an EU-funding scheme in Finland. How you cope with possible negative side-effects of phosphorus losses from peatland restoration projects in Finland. How do you cope with EU requirements on analyzing for possible cumulative effects of projects
The Danish Agricultural Agency has expressed a strong interest in: Examples on Finnish management of funding schemes, requirements, control, EU-requirements, how do you apply N-measures? What good/bad experiences do you have? What challenges have you experienced implementing EU-policies for N-measures and how have you tried to manage them?)
- 10:45-11:30 Constructed wetlands in relation to the Danish implementing of the CAP-reform (The Danish agricultural agency participates with the three employees responsible for the funding scheme for constructed wetlands, Charlotte Kjær Madsen, Henriette Hillerup Larsen and Niels Christian Sibbern Langvad)
- 11:30-12:00 The regulatory framework for reducing nutrient pollution to waters; mandatory regulation and collective measures. SEGES work with catchment officers (Simon Bjorholm, SEGES)
- 12:00-12:45 Lunch
- 12:45-13:15 Experiences of a local catchment officer (Rikke Skyum, Djurslands Landboforening)
- 13:15-13:45 SEGES work with developing drainage measures (Majken Meldorf Deichmann, SEGES)
- 13:45-14:30 AUs work with drainage filter technologies and river valley and peatland restoration.
